

The TFAF-Creative Thinker Magazine

We believe that NOW is the TIME for some

- ♥ **PROBLEM SOLVING** – Making things better
- ♥ **COLLABORATION** – Working together
- ♥ **PERSONAL MONEY MANAGEMENT** – Manage your finances effectively, make informed money decisions, & maintain a written financial plan
- ♥ **CREATIVITY** – Thinking outside the box
- ♥ **NEUTRAL MIND** – Open to seeing the big picture both positive & negative
- ♥ **PROACTIVE LISTENING & EFFECTIVE COMMUNICATIONS** – Getting & delivering the message
- ♥ **ETHICS** – Doing the right thing, do no harm
- ♥ **LEADERSHIP** – Demonstrate responsibility & guide others effectively.

For you, your family, your company, your country, our WORLD!

What creative ideas / thoughts do you have for solutions / new products / jobs / business opportunity creations during these challenging times?

Here are some random thoughts to get your creative juices flowing. Please share your innovative ideas with us and we will add the best to future editions. Circulate it to your family & friends / colleagues and encourage them to do the same!!!

Getting Your Creative Juices Flowing

To help get your creative juices flowing

Can you solve this?

<http://www.thefinancialawarenessfoundation.org/pdf/TFAF-CanYouDoThis.pdf>

Can you do this?

Using only 4 straight lines AND without lifting a pencil (pen) from the paper, how long will it take you to touch all 9 smiles?

If after 2 minutes you cannot solve this simple question, here's a clue – Think Outside the Box.

If you still cannot solve it go to the last items and you will find the solution. 😊

[Solutions](#)

"Think of it. We are blessed with technology that would be indescribable to our forefathers. We have the wherewithal, the know-it-all to feed everybody, clothe everybody, and give every human on Earth a chance. We know now what we could never have known before — that we now have the option for all humanity to make it successfully on this planet in this lifetime. Whether it is to be Utopia or Oblivion will be a touch-and-go relay race right up to the final moment." —R. Buckminster Fuller

The Ghanaian Couple That Built Over 500 Apartments In Ghana

<https://www.youtube.com/watch?v=s9hSrPHObal&feature=youtu.be>

creating jobs in remote communities while helping to build a sustainable overall economy!

This is an excellent example of how planned communities can build wealth while improving the quality of life!!! If we can also do this ecologically - power, water, safe waste disposal or reprocess, recyclables, ... - and also from an 'END poverty, hunger, illiteracy, and poor healthcare' perspective this can be a real win-win-win for all!!!

29.

Can we build shelter and housing for all? Can we redesign housing to meet our living needs with efficient space planning and quality ecological friendly and efficient sustainable materials

https://www.ted.com/talks/vishaan_chakrabarti_how_we_can_build_sustainable_equitable_cities_after_the_pandemic?utm_source=newsletter_daily&utm_campaign=daily&utm_medium=email&utm_content=button_2020-06-29

Cities are engines of culture, commerce, knowledge and community, but they're also centers of inequality and poverty. As the world rebuilds from the coronavirus pandemic, can we transform cities into bastions of equity and sustainability? Architect and educator Vishaan Chakrabarti discusses a new urban agenda that provides equitable housing, health care and transportation for all -- and helps build cities rooted in our desire to connect at a human level. "We need a new narrative of generosity, not austerity," he says. (This virtual conversation, hosted by TED arts and design curator Chee Pearlman and head of curation Helen Walters, was recorded June 10, 2020.)

38.

The Environmental Impact of Cement and Concrete

The Environmental Impact of Cement and Concrete

The cement and concrete industry is responsible for an estimated 8% of global greenhouse gas emissions, accounting for more than 1.5 billion tons of carbon dioxide released into the atmosphere in 2018. From the quarrying of materials to the energy-hungry kilns and chemical processes involved, it's among the most challenging sectors to decarbonize.

Meet the newest unconventional weapon against future wildfires: goats. Lani Malmberg travels around the West with a few hundred goats, which eat the tall brush and grasses that power wildfires and restore fire-ravaged lands to greener pastures. After the goats digest the brush, their waste returns organic matter to the soil, increasing its potential to hold water — a 1 percent increase in organic matter can hold an additional 16,500 gallons of water per acre, Malmberg said.

<https://www.npr.org/2020/01/05/792458505/california-cities-turn-to-hired-hooves-to-help-prevent-massive-wildfires>

68.

On target: How to succeed with carbon-reduction initiatives
McKinsey research reveals which industries are on track to meet green objectives and how they got there.

The argument for global companies to reduce their greenhouse-gas (GHG) emissions is clearer than it has ever been:

- Business operations around the world are now subject to greater climate and transition risks.
- Consumers are clamoring for eco-friendly products and responsible corporate behaviors.
- Investors are increasingly embracing capital-allocation strategies that take environmental, social, and governance (ESG) issues into account.
- Policy makers and government organizations are exploring the potential regulation of carbon emissions.
- In response, organizations across all industries have declared GHG-emission-reduction targets—including for some a “net-zero commitment,” in which a company ensures that emissions from its value-chain activities create no net climate impact.

Show we rethink what we are teaching in our schools?

Learning is lifelong and never ends...

Show we be teaching life skills needed today and into the future like personal finance, wellness, parenting, communications, collaborative work, critical thinking, and so much more?

Should we be tracking the job markets of the future and developing circumlunar around the skillsets needed to be successful?

Do we need to go to school until we are into our early 20's to be productive? What if we incorporate mentorships, internships, and apprenticeships into our system of education?

72.

Resetting the way we teach is vital for all our futures

https://www.weforum.org/agenda/2020/08/science-education-reset-stem-technology/?utm_source=sfmc&utm_medium=email&utm_campaign=2729072_Agenda_w ekly-21August2020&utm_term=&emailType=Newsletter

This is so true domestically and globally

Caution: We believe sharing financial awareness and financial literacy can be highly contagious! Page 17

“You can rest assured that if you devote your time and attention to the highest advantage of others, the Universe will support you, always and only in the nick of time.” —R. Buckminster Fuller

There is something in life called “Social Capital. The people you know; the people who know you and how they know you. What's social capital? Listen to this,

Quite unfortunately, people think or behave like social capital is only needed on weddings and burials. That is why you see someone will not have contacted you in ten years but out of the blue they are sending you a message, “Hello so and so, long time, next Sunday is my pre-wedding. Or my uncle is dead, please I need your support.”!

Social capital is not built overnight; it is reciprocal and does not need money (especially in this virtually connected world) to build. It just needs being sensitive that people have emotions and that you can't sneak into their lives only when you need help.

Social capital is massively important and when built and used correctly, it can make a very big difference to one's quality of life. It can save you money, make you money, get you a better job, make things easier and safer, it can save you from prison, or save your life: it can save your time and effort, and make life more enjoyable and productive.

As we progress through the year, please learn to connect with people in your circles and not only at Christmas. Check on people, send someone a birthday message, check their timelines and comment something positive and inspirational. Pick your phone and call someone, or text them. It could be your relative, your colleague, your former schoolmate, a former or current boss, your CEO, your parents etc.

Creating a connection with people is important for building your social capital. And even if they don't respond, at least keep in touch and don't just reach out when you are in need. Even some on Whatsup don't comment on any issue you put across they just read and keep quiet but that should not deter you, continue communicating.

Most importantly, respect everyone no matter their status in life and be there when others need you. Be a solution, an encouragement and inspiration. Avoid being a leech, a user or nagger. Just be a nice person who in a calculated way stays in touch with people and brings joy, encouragement and hope.

The most important asset you have in life is not your job, money or title; its people. Your network is your net worth"

75. Distance learning survival guide

This school year will be different from any other parents and caregivers have experienced before. Your kids may be returning to school on modified schedules or learning full-time at home. No matter where or when your child will be learning this year, we're here to help.

We've put together this parent and caregiver survival guide to share advice, tips, and resources to help your child get a #StrongStart to an uncertain school year.

79. **Using University Students / K-12 student to solve or environment and social challenges**

We believe that one of worlds most underutilized resources are the creative thoughts and energies of our students worldwide. We are doing nonprofit work on four continents and within 8 growing universities. Many of these have over 30,000 students and are in developing countries. Some of these countries have huge percentages of their populations living in extreme poverty and hunger.

Why can't we annual ask these students and their faculty and staff (University/ College and K-12) to address and come up with recommendations to solving their countries / communities 5 top environmental and social challenges as a require class each semester?

Young people and their teachers around the world are so very smart, creative and can really make a huge difference; these young people are the ones that will soon have to live with and address the problems; why can't we give them an opportunity to be part of the solution? Isn't that an important part of learning?

Just think of a University like Makerere in Uganda that has a student enrollment of over 35,000 and staff of over 3,100 focusing their mental energy and thoughts on how to solve their lack of water, hunger, poverty, economic uncertainty, healthcare and other social challenges. Thanks again for all you and Mrs. Gates are doing.

105. Solar Power Water Wells

Innovation: Africa is a 501 (c)(3) NY based non- profit organization that brings Israeli solar, water and agricultural technologies to rural African villages.

Innovation: Africa uses solar energy to pump clean water from underground aquifers. Our solar water pumping system is comprised of a 10-meter water tower equipped with solar panels, a 10,000 liter water tank, a solar-powered pump and 8km of piping that reaches 10-15 water stations, located strategically throughout the village. Over 30,000 liters of water is pumped per day, impacting the lives of up to 10,000 people in each village.

Since 2008, Innovation: Africa's local team of managers, engineers and contractors have constructed over 300 solar water pumping systems, across 10 African countries. Still today, over 450 million people across Africa do not have access to clean water.

Agriculture's connected future: How technology can yield new growth

We find the value of deploying advanced connectivity on these

The FINANCIAL AWARENESS Foundation

A 501(c)(3) Nonprofit Dedicated to

Significantly *Improving financial awareness & financial literacy™*

Connected technologies offer an additional, indirect benefit, the value of which is not included in the estimates given in these use cases. The global farming industry is highly fragmented, with most labor done by individual farm owners. Particularly in Asia and Africa, few farms employ outside workers. On such farms, the adoption of connectivity solutions should free significant time for farmers, which they can use to farm additional land for pay or to pursue work outside the industry.

farms to achieve such labor efficiencies represents almost \$120 billion, bringing the total value of enhanced connectivity from direct and indirect outcomes to more than \$620 billion by 2030. .

<https://www.mckinsey.com/industries/agriculture/our-insights/agricultures-connected-future-how-technology-can-yield-new-growth?cid=other-eml-alt-mip-mck&hdpid=943e6e3e-2dbd-4cfb-84dd-233111923ae7&hctky=12304622&hlkid=56c498496fcd4eb69b90287c6dbd8123>

Aeroponic Tower System

The vertical hydroponic tower actually is aeroponic tower growing system, which is supply plant nutrients by atomizing water.

Compared with hydroponics system, the advantage of aeroponic grow tower is that it can help the roots of plants get more oxygen, use less water and nutrient, these can also help you reduce wastewater generation, and save more cost and technical investment.

Especially suitable for the building of greenhouse hydroponic systems in high-temperature areas, don't worry about the fact that the plant factory does not have complete control technology. Like the phenomenon of the root rotten, caused by the water temperature is too high due to lack of temperature control system.

<https://www.hydroponicsfactory.com/22.html>

Would this work in your community?

A vertical 1,500 acre farm??? Wow

Plenty- Our Produce - Indoor vertical farms create the perfect environment for plants, reducing the unpredictability of changing climates. No bleach, no pesticides on our plants. No GMOs. Just pure food that tastes like nature intended

We Feed More For Less - Plenty farms use up to 99% less land than conventional farms. Efficiency at Scale - Imagine a 1,500 acre farm. Now, imagine that fitting inside your favorite grocery store, growing up to 350x more. That's efficient.

Social Responsibility - Feeding Our Communities In Need

Backyard gardens empower women
Fresh fruit and veg is expensive in Ghana, with demand met mainly by imports.

Alberta Akosa's NGO Agrihouse Foundation encourages women to plant their own backyard gardens, which allows them to feed their families and also secures them an income.

The Food That Built America

Season three of the popular nonfiction series "The Food That Built America" will satisfy viewers' appetites by sharing the origin stories of a new group of bold pioneers behind America's most iconic food empires such as Orville Redenbacher, Ettore "Chef" Boiardi, Wally Amos, Debbi Fields, and Tom Carvel among others. Before these brands became household names, they came from brilliant – sometimes ruthless – visionaries who revolutionized food and changed the culinary landscape of America forever. Through dramatic recreations, fascinating facts, and expert commentary, this season delves into the unbelievable stories of grit, creativity, and determination by these culinary entrepreneurs whose unrelenting innovation helped them come out on top.

He's also an alumni of Makerere University and founding COO for the International Improving Financial Awareness & Financial Literacy Research Center at Makerere University.

135.

136.

Are you familiar with The First Tee Golf Program and its nine core values? It's a quite a large successful youth program in the US touching 3.4 million kids annually.

<https://firsttee.org/impact/nine-core-values/>

We feel that the 10th Core Value should be Improving Financial Awareness & Financial Literacy.

In line with the above we are in the early stages of developing youth programs around ball games with 10 core values. Using First Tee as a model we propose to do the same for:

- ♥ Soccer/Football
- ♥ Baseball
- ♥ Basketball
- ♥ Football
- ♥ Tennis
- ♥ Volleyball
- ♥ Ping Pong

We possibly could develop a digital version for these technology games! We can discuss this further when we speak.

Assemble the 10+ Best Medical Minds to discuss and identify the best solutions and approaches to COVID-19. If so it would be great if this key group has regular meetings and weekly share their key thoughts and finding on

- Short-term, intermediate and long term plans
- What's working and what's not
- What we should be doing to protect ourselves and those around us;
- If we get COVID-19 what's the best way to deal with it.
- How do we filter FAKE news and people's opinions presented as facts?

What kind of materials should our masks be made of? Cotton 200 or 1500 thread count or polyester, or silk, or space age materials, combinations? should they have a disposable filter? If so what should it be made of? ...

166.

Planning Thought-List for the COVID-19 Healthcare Crisis & Economic / Financial Crisis

- 'Planning Thought-List' - for the COVID-19

<http://www.thefinancialawarenessfoundation.org/pdf/TFAF-Thought-List-Healthcare-FinancialCrisis.pdf>

Have you truly thought through what is happening and how it affects you, your family and your community today and tomorrow?

167.

While healthcare professionals are working on solutions, can others also be looking for solutions?

Can we create a set of glasses that show the virus on us and others?

Can we use some form of sound, or ultra sound to kill the virus?

168.

Africa needs vaccines. What would it take educate African's to make them?

<https://www.mckinsey.com/industries/pharmaceuticals-and-medical-products/our-insights/africa-needs-vaccines-what-would-it-take-to-make-them-here?cid=other-eml-dre-mip-mck&hlid=4f8e7bf1f8e34942bcde6397df543243&hctky=12304622&hdpid=c6e8b026-fbc4-470f-ba5d-9ab57177c7c7>

What would this do for jobs today and into the future? further advancements in healthcare? with this new knowledge and thinking further advancements in education? technology? construction? ecology? ... (and so much more) quality of life for all???

169.

Who can invent the best masks for us to wear?

What's it made of? Cotton, silk, copper, new space age material? A combination?

Is the filter built into the fabric?

Or do we have to replace a filter with each wearing?

Is anyone doing research here?

Can we all have N 95 protection Mask that is washable, stylish, and inexpensive?

Whoever invents this will earn a lot of money while making many people happy and keep them healthy!!!

170.

In rural areas are online healthcare visits taking place?

This can bring a form of much needed healthcare immediately into rural areas

172.

A recent McKinsey Global Institute report estimates that current bio innovations could relieve 1 to 3 percent of the total global burden of disease within the next two decades. Although seemingly small, that range would be roughly analogous to the global percentages of lung cancer, breast cancer, and prostate cancer combined. And over a longer period, if the full potential of today's technologies is realized, we could confront 45 percent of the world's disease burden.

<https://www.mckinsey.com/industries/pharmaceuticals-and-medical-products/our-insights/the-bio-revolution-innovations-transforming-economies-societies-and-our-lives?cid=other-eml-shl-mip-mck&hlkid=d683f43049fe412ca62a34f17e186b47&hctky=12304622&hdpid=7e3bc6ae-50ba-4531-b8bd-1c57a196ff62>

The safety of all depends on the contribution from everyone!!! --- Aaron Maniam

https://www.ted.com/talks/aaron_maniam_new_ways_to_understand_life_in_a_pandemic?utm_source=newsletter_daily&utm_campaign=daily&utm_medium=email&utm_content=button_2020-07-24

A powerful Ted presentation from Poet and policymaker Aaron Maniam who describes how the language we use to explain COVID-19 shapes the way we think about it -- whether it's as a "war," a "journey" or, as he suggests, an "ecology." He encourages us to explore a range of imaginative, interlocking metaphors to gain a deeper understanding of the pandemic -- and shows how this can help us to envision a better, more inclusive future

174.

What if you could live longer and healthier?
Have you heard anything about ...

Our epigenetic clocks?

<https://www.nature.com/articles/d41586-022-00077-8>

If biological ageing can be slowed, halted or rewound, are the machine-learning algorithms the best way to measure it? Some experts are unconvinced.

175.

Healthcare and wellness should not be a privilege but a fundamental human right for all!

What if the Improving Financial Awareness & Financial Literacy Movement could act as a catalyst to bring about this change?

The lack of vaccines and medications, along with the prevalence of respiratory infections, HIV/AIDS, diarrhea, malaria, and tuberculosis, is a major problem in African countries, accounting for 80% of health issues across the continent.

How many quality jobs would it create - research, manufacturing, healthcare, retail, etc. if it was seen as a priority!!!

Isn't this an absolute necessity to fixing(growing sustainable) the economy in most African countries?

The FINANCIAL AWARENESS Foundation

A 501(c)(3) Nonprofit Dedicated to

Significantly *Improving financial awareness & financial literacy™*

Caution: We believe sharing financial awareness and financial literacy can be highly contagious! Page 35

And it's not just Africa. Similar challenges are faced in other parts of the world, such as Brazil and India.

As well as for India? And Brazil?

Imagine the impact if healthcare was prioritized:

Countless quality jobs would be created in research, manufacturing, healthcare, retail, and more.

Economic growth in African countries, India, and Brazil would be sustainable and robust.

Isn't this an absolute necessity for fixing and growing the economies in these regions?

Interesting communication
The Financial Literacy Delusion
We need honest narratives about the distribution of wealth

<https://publicseminar.org/essays/the-financial-literacy-delusion/>

Interesting communication and I would like to respond further when time permits. Initial comments: In our opinion financial awareness and financial literacy is NOT being taught in these academic curriculums, nor are other important and necessary life skills.

In so many situations financial literacy education is directly tied to financial inclusion getting everyone online to buy / be sold financial products that in so many cases people do not understand or use properly because they are not financially aware or financially literate. We STRONGLY believe that a smart and financially aware and financial literate consumer will acquire more and higher quality financial products and the financial product provider will sell more financial products at a fair profit.

As you may know in many parts of the world financial literacy deals only with savings, budgeting and debt management and many have never heard or thought about comprehensive financial planning which also includes:

- ♥ Helping people get and stay organized,
- ♥ Being a wise consumer (regardless of what the advertising community says having the most toys doesn't win the money game or the game of life),

The FINANCIAL AWARENESS Foundation

A 501(c)(3) Nonprofit Dedicated to

Significantly *Improving financial awareness & financial literacy™*

Caution: We believe sharing financial awareness and financial literacy can be highly contagious! Page 41

- ♥ Helping to identify what important for each person, then establishing personal and family short-term, mid-term and long-term - life - financial goals and values,
- ♥ Retirement/financial independence planning,
- ♥ Planning for major expenditures, many people overspend on their major expenditures trying to impress others, as they don't understand what they are doing
- ♥ Dealing with and understanding investments - planning with a purpose and a plan – as investing means expending money, time or assets with the expectation of achieving profit. As in life achieving a profit from investing is never for sure and requires proper due diligence to have a reasonable chance of success,
- ♥ Tax planning – many many people overpay their tax obligations and don't use the tax laws effectively
- ♥ Risk management / Insurance planning, and
- ♥ Estate gift and charitable planning, this is definitely not taught at home or school but is a major element of personal finances. So many people do not have nor understand why they need an up-to-date financial, estate and gift plan to protect themselves and their families, and don't see this as an opportunity to protect themselves, give them the best change of financial success, and to pass on values, knowledge and assets to future generations and important charitable causes to help make this a better world.

Many of Prof Soroko economic comments at true and also need to be addressed both though education and reforms; don't these usually go hand in hand??? Once We The People realize what really going on, and if it's not correct the work to make appropriate changes!!!

Out of time – Stay safe and health and best wishes to all
14 Most Expensive Countries for Retirement

For Americans leaving the workforce, retirement can be an opportunity to meet new people, learn new things and gain new experiences. But the amount of savings a retiree needs to live their desired lifestyle — their "retirement number" — varies widely from country to country.

In order to live comfortably in retirement, the average American would need to have saved around \$600,000, according to calculations by NetCredit, an online lender. But only 14% of those in their 40s and 50s are on track to do so, it said, citing recent research.

https://www.thinkadvisor.com/2021/02/16/14-most-expensive-countries-for-retirement/?kw=14%20Most%20Expensive%20Countries%20for%20Retirement&utm_source=email&utm_medium=enl&utm_campaign=dailywire_2storytempla te&utm_content=20210216&utm_term=tadv

The Improving Financial Awareness & Financial Literacy Movement – Worldwide

The Movement began in the USA over a decade ago; global financial literacy initiatives are increasing; we are contacted regularly for assistance, content and ideas from around the world. In 2018 we began The Improving Financial Awareness & Financial Literacy Movement in East Africa. This will touch ~ 150 million people; modeled after our work in the US. In 2020 we began Movements in Ghana, Brazil and India. We are now have The Movement developing within 4 continents and over a dozen countries. We also have initiated development activities and discussions for The International Improving Financial Awareness and Financial Literacy Research Centers within 12 Universities (and growing) to take on leadership roles within that country's or community's Movement.

Do we have a golden opportunity now to cure corruption and social injustices, everywhere? If so how do we best do it?

217. World Wealth

How is the world's wealth shared divided?

<https://www.visualcapitalist.com/all-of-the-worlds-wealth-in-one-visualization/>

https://en.wikipedia.org/wiki/List_of_countries_by_wealth_per_adult

218.

According to the Credit Suisse Global Wealth Report, the world's richest 1 percent, those with more than \$1 million, own 44 percent of the world's wealth. Their data also shows that adults with less than \$10,000 in wealth make up 56.6 percent of the world's population but hold less than 2 percent of global wealth.

<https://inequality.org/facts/global-inequality/#:~:text=According%20to%20the%20Credit%20Suisse,2%20percent%20of%20global%20wealth>

"Ultra high net worth individuals" — the wealth management industry's term for people worth more than \$30 million — hold an astoundingly disproportionate share of global wealth. These wealth owners held 7.2 percent of total global wealth, yet represent only a tiny fraction (0.002%) of the world population, based on Institute for Policy Studies analysis of Capgemini and Credit Suisse wealth data and Census Bureau population estimates.

The world's 10 richest male billionaires, according to Forbes, own \$801 billion in combined wealth, a sum greater than the total goods and services most nations produce on an annual basis, according to the International Monetary Fund. The globe is home to 2,153 billionaires, according to the 2019 Forbes ranking.

Those with extreme wealth have often accumulated their fortunes on the backs of people around the world who work for poor wages and under dangerous conditions. According to Oxfam, the wealth divide between the global billionaires and the bottom half of humanity is steadily growing. Between 2009 and 2018, the number of billionaires it took to equal the wealth of the world's poorest 50 percent fell from 380 to 26.

Do we need to develop a new form of politics that's not just based on right or left, democrats or republicans, democracy or socialism or capitalism?

223. Real Economics

Debt - The First 5000 Years

With the crazy political year in front of us here's an interesting book for you. I read it a couple of years ago and have started to reread it and it seems to be more meaningful today and wanted to share it with you.

It's entitled - Debt - The First 5000 Years

By David Graeber

Melville House is the Publisher

It's an International Best Seller

David Rolfe Graeber is a Professor of Anthropology at the London School of Economics; and past assistant professor of anthropology at Yale from 1998-2007 he specialized in theories of value and social theory.

It's also available in Kindle and in audio books; great eye opener and accompaniment for a long trip or cool winter weekend.

https://www.amazon.com/gp/product/B00Q1HZMCW?ref=dbs_p2d_P_R_popup_yes_pony_T1

It's a Great Book - answers a lot of troubling questions about our beginnings for Debt, Money, and societies and what we were not taught in econ and the affects it has had and does have on people's beliefs!!! I minored in econ and wish we had been given this book in school!

Highly recommend it.

Do you know how money is created in your country?

Will raising the standard of living for all The People of the World help make this a better world for everyone?

If the poor get richer will the richer get richer?

Maybe we can create some contests?

Reality games seem successful – what about focusing that energy and creativity to helping to solve real world challenges and everyday social challenges like hunger, poverty, quality medical care for all, quality of life issues, ending racism and social injustice, etc.

224.

Democratic Lottery -The Powerball Revolution

Adam Cronkright

<http://revisionisthistory.com/episodes/44-the-powerball-revolution>

Adam Cronkright co-founded Democracy In Practice, a non-profit that helps schools replace student elections with lotteries, and recently founded Of By For, a grassroots effort to put real people at the center of politics.

<https://democracyinpractice.org/>

And why not re-imagine leadership more broadly?

Our work is part of a global rise in the use of lotteries to sidestep the many failures of elections, and empower representative groups of everyday people. A democratic practice [rooted in ancient Greece](#). Most of this is happening *outside* of schools, in the form of Citizens' Panels and Citizens' Assemblies. One of our founders is working to build [a movement in the US](#), starting with a [Citizens' Panel](#) on Covid-19. And we're part of [Democracy R&D](#), a global network of practitioners working to get us beyond elections.

Is there a better way to run the World?
In the US alone, for the 2015-16 the Presidential and Congressional candidates raised and spend over \$3 Billion!!!

<https://www.fec.gov/updates/statistical-summary-24-month-campaign-activity-2015-2016-election-cycle/#:~:text=II.,Congressional%20candidates,2015%20and%20December%2031%2C%202016>

How much was spent on all the other elections?

What is being spent worldwide?

With \$3 Billion

- How many hungry people could be fed and taught to work
- How many kids could be have provided a quality education?
- What illnesses could we have found a cure for?
- Could we invent an affordable mask to help protect millions each year from the flu virus?

237.

ances in the last presidential election cycle in 2016. (\$6.5 billion). In fact, the 2020 presidential race alone (\$6.6 billion in spending) is projected to cost more than the entire 2016 election, according to CRP.

Government is a huge holder of real estate, as well as a tenant. For example, the US federal government owns about 885 million square feet of building space, and it leases another 254 million square feet.⁴ For cities, some estimates suggest that the entire public portfolio of real estate within a city has the same value as the city's GDP and could represent a quarter of the total market value of real estate.⁵

'True Gen': Generation Z and its implications for companies

Governments can realize the value of public real estate in two ways—earning their passage through a modern-day version of the Greek legend of Scylla and Charybdis. First and most important, they can increase the value of the asset through better management or rethinking its use. For example, in Rio de Janeiro, Brazil, Escola Municipal Doutor Cícero Penna is an ordinary public school in an extraordinary setting. It's located on Avenida Atlântica, the famous stretch facing Copacabana Beach, surrounded by luxury high-rises on perhaps the most expensive land in the country. Education is of course vital, but it could be conducted a couple of blocks away on much cheaper land, in an environment that might also be more conducive to students' learning. The city could realize the highest value of the beachfront property, while still retaining ownership. It could build an equivalent or better school with part of the revenue from developing the more valuable property; the remainder would flow into the general account. Cities around the world have thousands of similarly overlooked opportunities.

Problem Solving Formula

"We can not solve our problems with the same level of thinking that created them."
- Albert Einstein

238. Six-Steps

- Step 1. Define Your Goals:** State your personal and financial goals as concisely as possible.
- Step 2. Gather & Organize Your Data:** Make sure your financial information is organized so that your current financial position is clear.
- Step 3. Analyze Your Situation:** Look at your current financial position. Are you meeting your goals, or are you falling short?
- Step 4. Develop Your Strategies:** Identify plans that will help you achieve your goals in the most efficient manner.
- Step 5. Implement Your Plan:** This is your action step. Take definitive measures to achieve your goals.
- Step 6. Track & Monitor Your Progress:** Depending on which of the six areas you are reviewing, check your progress on a monthly, quarterly, semiannual, or annual basis.

What can 3 D Printing do for your ideas?

<https://intelligence.weforum.org/topics/a1Gb0000001k6l5EAI?tab=publications>

3D printing (or “additive manufacturing”) can produce lightweight structures with unprecedented, complex geometries, integrated sensors, and efficient, hollow and lattice structures. However, using 3D printing for parts can be challenging for designers. In the past, traditional guidelines for designers dictated that part shapes and features be kept as simple as possible, in order to reduce the number of required processing steps and the general cost of production. Entire generations of designers were trained to develop this mindset. Now, when designing for 3D printing, they are being advised to rethink traditional geometry and implement an approach inspired by lightweight, bionic concepts that can add significant value to a produced part. This requires an entirely new type of education (or re-education) in order to grasp all of the unique possibilities for using 3D printing to improve product functionality. Some related techniques include using dedicated software to reduce the weight of parts - which can be particularly useful in the aerospace and biomedical industries.

The Roads that Built America

Starting the 1890s in New England, highway commissions were created as an “effort to get the farmers out of the mud.”² Stating funding for highways began with mostly eastern states, but by 1916, all except eight states had some type of funding put towards highway construction. After World War II the automobile's industrial growth began to dominate the American industries. Millions of jobs were in great relation to the automobile. The traffic levels on the highways increase so dramatically that better conditions became a necessity. The American Automobile Association (AAA) lobbied for the adjustments. Federal-Aid Highway Acts were first created in 1921, and continued with major failures and changes to each following Act, until the 1956 Act, with minor improvements for over 20 years.

295.

“Never forget that you are one of a kind. Never forget that if there weren’t any need for you in all your uniqueness to be on this earth, you wouldn’t be here in the first place. And never forget, no matter how overwhelming life’s challenges and problems seem to be, **that one person can make a difference in the world.** In fact, it is always because of one person that all the changes that matter in the world come about. **So be that one person.**”

—R. Buckminster Fuller

Can you do this?

296. The Solution

297.

Can you do this?

Using only 4 straight lines AND without lifting a pencil (pen) from the paper, how long will it take you to touch all 9 smiles?

Share this with friends and family; but don't share the solutions to quickly!!!

If they cannot solve the challenge in a couple of minutes – Give them this clue – Think Outside the Box!!!

If they still cannot find it go to the last entry in the TFAF-Creative Solutions.

See the solution link below

We believe that NOW is the TIME for some

- ♥ PROBLEM SOLVING – Making things better
- ♥ COLLABORATION – Working together
- ♥ CREATIVITY – Thinking outside the box
- ♥ NEUTRAL MIND – Open to seeing the big picture both positive & negative
- ♥ PROACTIVE LISTENING & EFFECTIVE COMMUNICATIONS – Getting and delivering the message
- ♥ ETHICS – Doing the right thing, do no harm

For you, your family, your company, your country, our WORLD!

“Dreams are something you create in your mind that can take any shape or form, while goals are based on taking action. With goals, a lot of focus, planning, problem solving, and attention is needed. Dreams, on the other hand, don't need that kind of focus”. - Peter Kwadwo Asare Nyarko

Centre for Financial Literacy Education Africa

CFLE–AFRICA is a Ghana-based not-for-profit social organization that develops and promotes financial literacy skills in Africa, especially young Africans, and female groups.

CFLE-Africa's mission is to empower and educate all Africans to make informed financial decisions. Through comprehensive financial planning and coaching, **CFLE-Africa** helps all Africans make informed money decisions, plan for the future, and live a debt-free life. **CFLE-Africa** is the **Lead TFAF Ambassador in Ghana, and in Africa.**

CFLE-Africa creates massive financial awareness and prepare individuals to be financially informed citizens and leaders. That means knowing what they want to do with their life, and their financial resources through a comprehensive financial, estate and gift plan. Further, **CFLE-Africa** helps families pass on values, knowledge and assets to future generations, and charitable causes, to help make this a better world for all. **CFLE-Africa** advocates for financial literacy through events and campaigns. They host quarterly **SikaSukuu** for market place women and small-scale business owners in remote and rural communities in Ghana, and other African countries.

To help address the lack of financial awareness along with the financial illiteracy epidemic **CFLE-Africa** led by the Founding Executive Director, **Mr. Peter Kwadwo Asare Nyarko** (a Social Entrepreneur, Financial Literacy Advocate, and Educator, Author, and Public Speaker) is taking an active leadership role to recognize organizations and their management, and individuals that are championing improving financial awareness and financial literacy. **CFLE-Africa** is then uniting them with other associations, organizations, NGOs, nonprofits, educational institutions, municipalities, employers, the news media, and concerned individuals to actively focus this vast community resource into **The Improving Financial Awareness & Financial Literacy Movement in Ghana** with its semi-annual concentrated personal finance content media blitz.

CFLE-Africa gives volunteers a chance to share what they have learned with the community as part of **The Movement** which is championed by **The Financial Awareness Foundation (TFAF)** a partnered organization. This is open to student clubs, academic institutions, other volunteered organization, financial service professionals, and their associations and members, employers, and municipalities. **CFLE-Africa** working on a yearly **Financial Literacy Challenge** for High School Students to compete to share their financial awareness and financial literacy for scholarships, awards, and recognition.

You can learn more about [CFLE-Africa](#).

The FINANCIAL AWARENESS Foundation

A 501(c)(3) Nonprofit Dedicated to

Significantly *Improving financial awareness & financial literacy™*

Caution: We believe sharing financial awareness and financial literacy can be highly contagious! Page 65

The Financial Awareness Foundation (TFAF)

TFAF is a 501(c)(3) USA-based nonprofit organization. Its mission is to significantly help solve a major social challenge dealing with the lack of financial awareness along with the financial illiteracy epidemic. They believe that teaching financial awareness, financial literacy and the essential principles of smart money management are so very important. This provides people the tools of empowerment for making lifelong informed money decisions, giving them the best probability of living a quality life without outliving their wealth; and for passing on personal values, knowledge & assets to future generations to make their lives & this world a better place.

TFAF has two main focal points and they revolve around:

- Taking an active leadership role to recognize organizations and their management that are championing improving financial awareness and financial literacy. Unite them with other associations, organizations, nonprofits, educational institutions, municipalities, employers, and the news media to actively focus their vast community resources on **The Improving Financial Awareness & Financial Literacy Movement** around a growing concentrated personal finance content media blitz every six months through the strategic campaign venues celebrating
 - April as **Financial Literacy Month** and six months later
 - October as **Estate & Gift Planning Awareness Month**

The plan is to touch the majority of the general public, high net worth individuals, financial service and nonprofit professionals and their organizations at least twice a year through these strategic venues, with educational and motivating reminders to get and keep their financial house in order with current financial, estate, and gift plans.

To help address the global lack of financial awareness and the financial illiteracy epidemic **The Movement** began in the USA over a decade ago; global financial literacy initiatives are increasing; we are contacted regularly for assistance, content, and ideas from around the world. In 2018 we began **The Improving Financial Awareness & Financial Literacy Movement** in several East African Countries. This will touch ~ 150 million people; modeled after our work in the US. In 2020 The Movement expanded into Ghana – West Africa, South America, and India. We now have **The Movement** developing within 5 continents, over a dozen plus countries. We also have initiated development activities and discussions for **The International Improving Financial Awareness and Financial Literacy Research Centers** in Universities each country domestically and internationally. They are planning on taking leadership roles within their country's and community's improving financial awareness and financial literacy activities.

We strongly believe that financial awareness & financial literacy are fundamental life skills – not commonly taught at home or at school – required to live a successful life in today's world. As we work more internationally, we are learning that other key life skills are also not being taught, such as

- ♥ PROBLEM-SOLVING – Making things better
- ♥ COLLABORATION – Working together
- ♥ CREATIVITY – Thinking outside the box
- ♥ NEUTRAL MIND – Open to seeing the big picture both positive & negative
- ♥ PROACTIVE LISTENING & EFFECTIVE COMMUNICATIONS – Getting and delivering the message
- ♥ ETHICS – Doing the right thing, do no harm

Without these fundamentals, no wonder we have so many social and political challenges.

- Developing's and delivering's exceptional educational content and programs for We The People - the general public – rich to poor; and for financial service, nonprofit, and charitable gift planning professionals, and educational institutions that support the public's financial and estate and gift planning and charitable planning needs, ending inherited poverty for all.
- Serving as a catalyst for many needed improvements, gender equality, & sustainability.

Organizations & individuals are never required to financially support TFAF. Nor do they have to pay any marketing or membership fee, or licensing fees to participate in The Improving Financial Awareness & Financial Literacy Movement, campaigns, & programs. TFAF also develops and distributes high-quality education materials at 'NO Cost' for use for nonprofit purposes. But as a 501(c)(3) nonprofit organization, financial support, & contributions are always welcomed & very much appreciated.
