The Improving Financial Awareness & Financial Literacy Movement in Malawi **Executive Summary / Overview**

Malawi has a population of over 20 million with a workforce of about 8.4 million, (40%), with a stated unemployment rate over 5.4%. This leaves nearly 19 million Malawians (97% of our population) so poor they barely afford three meals a day for themselves and their family; in rural areas it is higher. Many are struggling to survive less than 1.90 USD per day. (International Poverty Line) ⁽¹⁾. We are also experiencing increases in debt.

We are not taught at home or school about planning for our future and why it's important to have current financial, estate and gift plans to protect ourselves and our families. We have a collection of serious problems resulting in high poverty. Moreover, a lack of financial awareness results in a **serious financial illiteracy epidemic**. This places a **HUGE** growing amount of pressure on families and friends, employers, and nonprofits; as well as the ultimate safety net of the government. This is not just a local epidemic it's an international one.

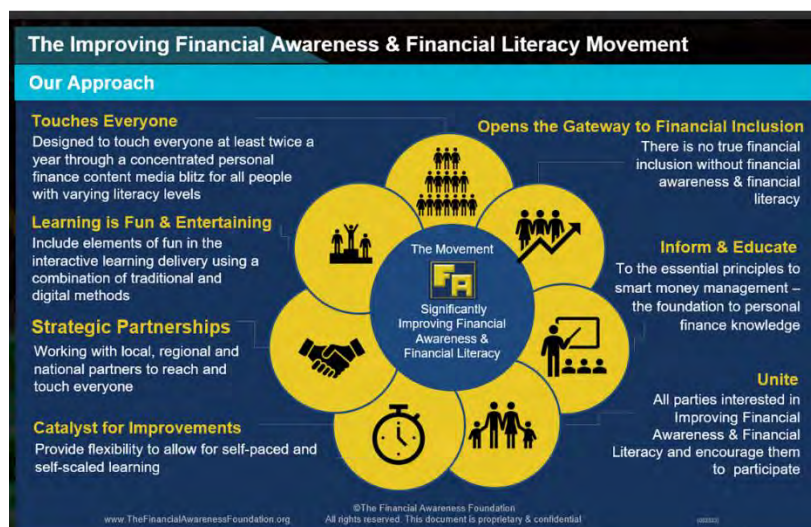

Earning and building personal wealth and managing personal finances today are more complicated and more important than ever. We're living longer and need to earn more, save more, and invest more wisely to build financial resources to care for ourselves and families. Many of us are insecure with our work and the future of our homes. We see our money being drained by the high cost of food and water, healthcare, housing, education, and taxes while dealing with the uncertainty of investments in our local and global economy. We worry about the future, or unfortunately in many cases, simply try not to think about it.

Most people are not taught the essential principles of smart money management – the foundation of personal finance knowledge - at home or in school. Thus, they don't have the proper tools to address everyday money decisions in an informed manner. This jeopardizes their financial and physical wellness, and their ability to realistically achieve and maintain their personal and family financial dreams, let alone enjoy a financially secure debt-free future.

One Powerful Solution

Would it be great if there is a real solution to this lack of financial awareness and financial illiteracy epidemic?

We **strongly** believe there is, and it revolves around better educating the general public – rich to poor, educators, financial service and nonprofit professionals on the essential principles of smart money management – the foundation to personal finance knowledge - while motivating them to get and keep their financial, estate and gift plans in order. People need access to better personal financial management tools and information, to communicate and work more effectively with their financial advisors and financial product providers, and to make better informed everyday money decisions.

Caution: We believe sharing financial awareness and financial literacy can be highly contagious!

We believe having better financial knowledge changes your world and the world around you... FOREVER

Countries and their communities are not financial service institutions and do not generally provide personal financial advice. However, countries and communities can serve as advocates for their citizens, workers, and politicians (The Community), and thus can encourage them to learn about the essential principles of money so they can make better every day informed money decisions. Also, they can encourage the members of The Community to get and keep their financial, estate and gift plans current as part of their personal growth and preparation for life and all its challenges, and end inherited poverty.

Governments and their local communities are in a strategic leadership position to materially improve the quality of life of their citizens. This happens through governance, social welfare programs, laws and taxes, defense and protection, advanced healthcare, educational initiatives, and a new powerful lifelong learning connection to the people who make up The Community.

Forming and participating in ***The Improving Financial Awareness & Financial Literacy Movement in Malawi*** will benefit 'The Entire Community in Malawi' by having happier and financially successful constituents, creating jobs and helping to build a robust economy, while reducing poverty, crime, and the strain on social welfare services, all while eradicating the financial illiteracy epidemic.

Significantly improving financial awareness & financial literacy can have a major positive impact on:

- **Healthcare** - Advancements in healthcare and technology are helping us to live longer, healthier, and higher quality lives. Improving financial awareness and financial literacy will help us earn more, and attract needed money for a high-quality education to take advantage of these healthcare advancements while reducing stress, a major cause of health problems.
- **Education** - Improving financial awareness and financial literacy will help us increase our quality of life, and attract the needed financial resources to advance our education system so that every man, woman, and child has the fundamental life skills, knowledge, and opportunity to live successful, happy and productive lives.
- **Agriculture & Food Supply** - The important agricultural sector is underdeveloped and largely inefficient, employing 62% of the workforce while contributing less than 22% to the national GDP. In many parts of the world under 10% of the agricultural workforce feeds the entire population and has a surplus for exports. Improving financial awareness and financial literacy will help to better manage natural resources, better feed, and provide for the growing population while creating higher-paying jobs for farmers to better grow a sustainable economy. ⁽²⁾
- **Economic Empowerment & Jobs** - Key drivers of our economy revolves around every man, woman, and child having their basic need covered with encouragement, education, and support to enhance all to live successful, happy, and productive lives. We give particular emphasis on significantly improving financial awareness and financial literacy as this empowers all people to make better informed everyday money decisions. This helps all Malawians to obtain great jobs, borrow responsibly, and build a better life for themselves and their families. This also encourages families, youth, women, and men in Malawi to explore and initiate innovative businesses and micro-enterprises.
- **Peace & Reduced Violence** - Lasting peace and reduced violence will only exist when THE PEOPLE of Malawi are properly nourished, healthy, have reasonable levels of debt when warranted, and have the knowledge and life skills that provide them the opportunity to live happy productive lives, raise their families in safety - and don't run out of their personal wealth and become a burden, before they pass-on – die.

The Strategy & Plan

1. Taking an active role to recognize 'thought leaders' and stakeholders that are and should be championing improving financial awareness and financial literacy.
2. Unite them with other associations, organizations, nonprofits, educational institutions, municipalities, employers and the news media to actively focus their vast community resources into The Improving Financial Awareness & Financial Literacy Movement with its **concentrated personal finance content media blitz** every six months built around two strategic campaign venues.
 - These are nationally, regionally and locally recognized months with government, corporate, nonprofits and academic leadership providing proclamations celebrating
 - ✓ **April known as Financial Literacy Month in Malawi**, and six months later
 - ✓ **October known as Estate & Gift Planning Awareness Month in Malawi**
3. Touch everyone - the general public, every woman, man and child, rich or poor - at least twice a year through these strategic venues, with educational and motivating materials and reminders to get and keep their financial house in order with a current financial, estate, and gift plans. Thus empowering 'The People' to make informed lifelong financial decisions.
4. Garner support from government, central banks, financial service organizations, corporations, academia, social services, and the media to actively participate in the movement.
5. Mobilize leading organizations and influencers, including government entities, financial service associations, employers, nonprofits, educational institutions, philanthropists, media outlets, and financial professionals, to serve as communication channels and advocates for improving financial awareness and financial literacy.

We understand that this is a massive undertaking; however, it can be accomplished in a relative short period of time through these leading organizations.

Together these organizations and their leaders represents a direct communication channel to all Malawians. Further, they have a vested interest in helping to raise the quality of life for all, as it will also improve their businesses, and allow them to do their jobs more effectively.

Improving Financial Awareness & Financial Literacy in Malawi™

Organizations Dedicated to Significantly *Improving financial awareness & financial literacy™*

Caution: We believe sharing financial awareness and financial literacy can be highly contagious!

The Financial Awareness Foundation (TFAF)

TFAF is a 501(c)(3) USA-based nonprofit organization. Its mission is to significantly help solve a major social challenge dealing with the lack of financial awareness along with the financial illiteracy epidemic. They believe that teaching financial awareness, financial literacy and the essential principles of smart money management are so very important. This provides people the tools of empowerment for making lifelong informed money decisions, giving them the best probability of living a quality life without outliving their wealth; and for passing on personal values, knowledge & assets to future generations to make their lives & this world a better place.

TFAF has two main focal points and they revolve around:

- Taking an active leadership role to recognize organizations and their management that are championing improving financial awareness and financial literacy. Unite them with other associations, organizations, nonprofits, educational institutions, municipalities, employers, and the news media to actively focus their vast community resources on **The Improving Financial Awareness & Financial Literacy Movement** around a growing concentrated personal finance content media blitz every six months through the strategic campaign venues celebrating
 - April as **Financial Literacy Month** and six months later
 - October as **Estate & Gift Planning Awareness Month**

The plan is to touch the majority of the general public, high net worth individuals, financial service and nonprofit professionals and their organizations at least twice a year through these strategic venues, with educational and motivating reminders to get and keep their financial house in order with current financial, estate, and gift plans.

To help address the global lack of financial awareness and the financial illiteracy epidemic **The Movement** began in the USA over a decade ago; global financial literacy initiatives are increasing; we are contacted regularly for assistance, content, and ideas from around the world. In 2018 we began **The Improving Financial Awareness & Financial Literacy Movement** in several East African Countries. This will touch ~ 150 million people; modeled after our work in the US. In 2020 The Movement expanded into Ghana – West Africa, South America, and India. We now have **The Movement** developing within 5 continents, over a dozen plus countries. We also have initiated development activities and discussions for **The International Improving Financial Awareness and Financial Literacy Research Centers** in Universities each country domestically and internationally. They are planning on taking leadership roles within their country's and community's improving financial awareness and financial literacy activities.

We strongly believe that financial awareness & financial literacy are fundamental life skills – not commonly taught at home or at school – required to live a successful life in today's world. As we work more internationally, we are learning that other key life skills are also not being taught, such as

- ♥ PROBLEM-SOLVING – Making things better
- ♥ COLLABORATION – Working together
- ♥ CREATIVITY – Thinking outside the box
- ♥ NEUTRAL MIND – Open to seeing the big picture both positive & negative
- ♥ PROACTIVE LISTENING & EFFECTIVE COMMUNICATIONS – Getting and delivering the message
- ♥ ETHICS – Doing the right thing, do no harm
- ♥ LEADERSHIP – Taking responsibility

Without these fundamentals, no wonder we have so many social and political challenges.
